PROFILE

I am an enthusiastic and self-motivated frontend developer with an MSc degree in Computer Science and over 13 years of industry experience, with extra attention to details and passion for UI/UX.

SKILLS

Technical skills: JavaScript, React, React hooks, Redux, Vue.js, GraphQL, OpenAPI, Node.js, Styled Components, SASS, SCSS, LESS, Bootstrap

Process: Agile/Scrum/Kanban

Tools: JIRA, Trello, Git (BitBucket, GitHub), SVN, Gulp, Grunt, npm, Jenkins, Photoshop, Figma, Sympli, Sketch, Yarn

Additional skills: BEM, UI, UX, mobile applications, SEO, cross-browser development, pixel-perfect development, TV development, semantics, accessibility standards WCAG, WordPress, Joomla, Magento, Squarespace, Ghost, Axis, Cypress, Jest, React test library

EXPERIENCE

LEAD FRONTEND DEVELOPER
Team ITG, UK - Contract

October 2023 – March 2024

Leading the development of cutting-edge frontend solutions for one of the Storyteq products, leveraging TypeScript and React. Providing technical leadership and guidance throughout project lifecycles.

- Estimated development efforts accurately, ensuring realistic timelines and resource allocation.
- Made substantial contributions to the design and development of scalable and high-performance frontend solutions, coded in TypeScript and utilizing React.
- Worked with OpenAPI specifications to help define API requirements and contracts, collaborating with backend developers to agree on best approaches when scoping work.
- Implemented modern styling techniques, creating visually appealing and responsive designs adhering to accessibility standards, particularly WCAG.

Languages: TypeScript, React, Redux, React Router, SCSS

Tools: Visual Studio Code, Jira, GitLab, Figma

Methodology: Agile Development

SENIOR DEVELOPER

October 2022 – September 2023

Moody's Analytics, London, UK - Contract

Contributed to the Development of PFaroe Insurance Platform for Investment Managers, a dynamic platform empowering investment managers to deliver captivating and data-driven presentations. Leveraged data analysis of insurer's investment portfolios, financial objectives, and risk profiles to enhance engagement and effectiveness of pitches.

- collaborated closely with project managers and stakeholders to devise strategic and technical solutions, aligning technology with business objectives and ensuring optimal project outcomes
- revamped the project pipeline, integrating Cloudflare Pages to enhance deployment efficiency and web performance, resulting in an elevated user experience
- applied expertise in React to implement new and innovative components, together with optimizing the performance of existing components, streamlining user workflows, and reducing loading times, thereby fostering a more responsive and seamless user interface.

Languages: React, GraphQL, React Testing Library, Cypress, JavaScript

Tools: Visual Studio Code, Azure DevOps, Datadog, Snyk

Methodology: Agile, Scrum

FRONTEND DEVELOPER

October 2020 – July 2022

Wowcher, London, UK - Contract

Engaged to solve a major scalability issue with the main Angular (version 1) app and fully migrated the application to React while ensuring reliability and allowing new features to be released.

- developed and released React components optimized for performance
- worked closely with business and other teams to implement a release pipeline that would support the ongoing migration

Languages: React.js (Hooks), HTML5, SASS, Redux, Cypress, React test library, Node.js

Tools: Visual Studio Code, Jira, Git (BitBucket), webpack, Photoshop, Sketch

Methodology: Agile, Scrum

LEAD FRONTEND DEVELOPER

March 2020 – September 2020

Spoods, Berlin, Germany - Contract

Engaged to evolve an advertising web platform by leading the frontend-development:

- Redesigned UI with a focus on UX
- Introduced and developed a React application into the existing Laravel website to provide new client-side features
- Recommended and adopted GraphQL

Languages: React (Hooks), HTML5, SASS, GraphQL (Apollo Client)

Tools: Visual Studio Code, GitLab, webpack, Photoshop, Sketch

Methodology: Agile, Scrum

UI ENGINEER

October 2019 – March 2020

Immediate Media Company, London, UK - Contract

Engaged to improve BBC History Extra and Radio Times websites:
- Expanded functionality for user profile UI using React components
- Sign-in / registration with social identity providers
- Added web push-notification capabilities

Languages: React, HTML5, SASS, JavaScript, Gherkin

Tools: Visual Studio Code, Jira, Git (BitBucket), yarn, Jenkins, webpack, Airship, Wordpress, Cucumber, AMP, Evolok

Methodology: Agile, Scrum

UI ENGINEER

January 2017 – September 2019

Massive Interactive (Deltatre | OTT Division) , London, UK

- Lead developer for BBC Britbox for Canada and US (TV app: WebOs and Tizen)
- Developer on projects: Telecine (web app), Deutsche Telekom (TV app), Axis (Massive platform)

Languages: React, Redux, HTML5, LESS, SASS, JavaScript, Haxe-react

Tools: IntelliJ IDEA, Jira, Git (BitBucket), yarn, npm, Jenkins, Photoshop, Sketch

Methodology: Agile, Scrum, Kanban

FRONTEND DEVELOPER

December 2015 – December 2016

Sympli, Washington D.C. Metro Area

Sympli is a set of tools for designers' and developers' collaboration. A pixel-perfect design handoff and implementation for teams that work with Photoshop, Sketch, Android Studio, and Xcode.

I was responsible for the design implementation of the websites and Photoshop plugin.

Languages: HTML, CSS, LESS, SASS (for plugin), JavaScript, Vue.js

Tools: PhpStorm, Jira, Git (BitBucket), Gulp, npm, git, Jenkins, Photoshop, Sketch

Links: https://sympli.io - product information website (HTML/CSS/JS, css-animation, UX)
                      https://app.sympli.io - product website (HTML/CSS/JS, css-animation, UX)
                      https://sympli.io/downloads/photoshop - Photoshop plugin (HTML/CSS/UX)

Methodology: Scrum (distributed team)

For a comprehensive list of all previous work experiences, including older roles, please request the full CV.

PROJECTS

BBC Britbox TV app (Canada and US)   November 2018 – August 2019

"The biggest streaming collection of British TV… ever." Frontend Development Lead for TV apps.

Languages: HTML, SASS, React

Tools: WebStorm, Sketch, Git (BitBucket), yarn, Jira, Axis

Link: https://www.britbox.com/about

Nasdaq trading, Corporate Financial Research   December 2014 – June 2015

The Nasdaq Stock Market is an American stock exchange. It is the second-largest exchange in the world by market capitalisation. I was responsible for the design implementation of the website.

Languages: HTML, CSS, JavaScript, Angular

Tools: Visual Studio, Jira, Git(BitBucket), Gulp, npm, Photoshop

Methodology: Scrum (distributed team)

Hogashop: B2B platform for hotels, restaurants and retail trading   November 2010 – September 2011

The HOGASHOP is an independent B2B order platform for hotels, catering, and retail trading. Customers can organize online their order processes with various suppliers - without learning different systems. Order lists, statistics, the order archive, and an inventory module support you organising your order and invoicing process. I was responsible for the design and implementation of the website and the design for the iPhone/iPad applications.

Languages: HTML, CSS, JavaScript

Tools: Phpstorm, Task manager, npm, Photoshop

Methodology: Scrum
